It is scary to think that we had wires inside of our wall that were arcing and could have started a fire at any time. Ting identified the hazard and the Ting electrician was able to quickly come in and fix it. My wife and I are grateful that Ting helped keep our family safe.

Living in a circa 1800s farm house, my family and I have always been concerned about the potential for electrical hazards with our older wiring. Shortly after setting up my Ting sensor, the Ting app quickly notified me of a potential electrical fire hazard. The Ting Service team called and we quickly isolated the source of the arcing hazard to an old chandelier in our dining room. I hate to think of what this could have become if not discovered by Ting. My family and I will rest easy knowing this hazard has been fixed, and Ting will keep watch over our house going forward. Bravo Ting!

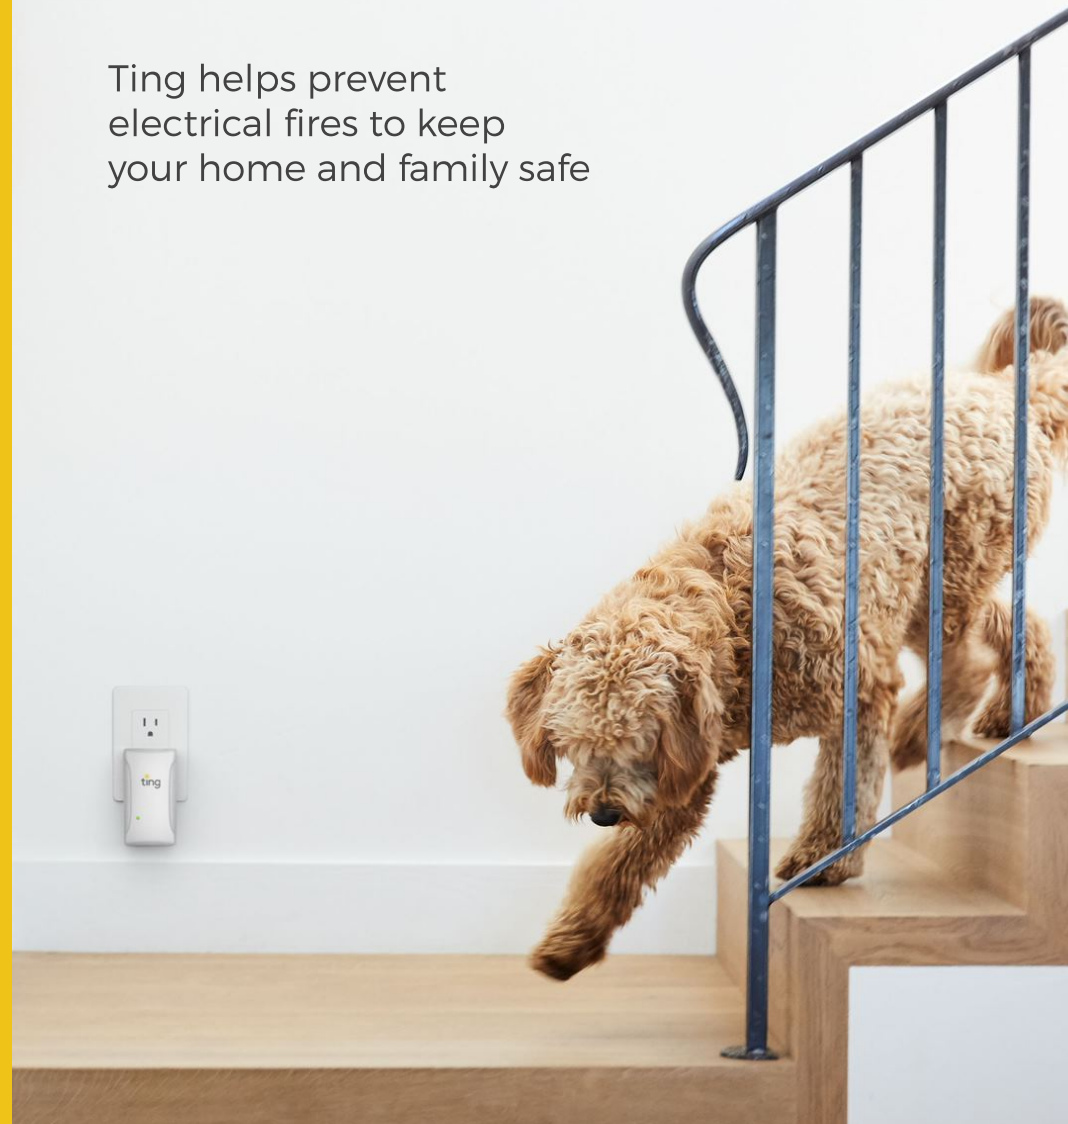

Small. Smart. Sophisticated.

Fire Safety, Simplified

Ting helps prevent
electrical fires to keep
your home and family safe

The most significant fire safety innovation since the smoke alarm

Electrical fires can be catastrophic.

Electrical malfunction remains one of the leading causes of residential fires and a leading cause of residential fire deaths, injuries and dollar loss.

Ting helps prevent electrical fires before they start.
